cti
TAK Training

Philosophy

At Chesapeake Technology International (CTI), we firmly believe that the effectiveness of any advanced tool hinges on the expertise of those who operate it. Our team brings a wealth of experience gained from their Special Operations backgrounds both as users and instructors of the TAK Family of Systems. This firsthand experience translates directly to our end users, empowering them to achieve maximum mission success.

Our dedicated trainers possess the capability to rapidly develop customized curriculum, ensuring that your specific mission requirements are met with precision. Whether it's classroom-based instruction or hands-on field support, CTI stands ready to meet a diverse range of needs.

Training & Support Services
ATAK, TAKX, WinTAK, iTAK & TAK Server

Tailored Content: Our training programs are tailored to meet the specific operational needs and skill levels of your team.

Expert Instructors: Sessions are led by experienced professionals who are adept in both the technical aspects of the TAK systems and their practical applications in real-world scenarios.

Hands-On Experience: We emphasize practical, hands-on experience to ensure users gain in-depth knowledge and proficiency.

TAK as a Service: Experience unparalleled flexibility and efficiency with our TAK as a Service, a cutting-edge solution that seamlessly integrates the power of the TAK Family of Systems into your operations, ensuring mission success with ease.

Training Courses

TAK Fundamentals: This 3 day training course covers the essential aspects of TAK fundamentals, from basic navigation to advanced features and practical exercises. These topics ensure that users gain a thorough understanding of TAK and its capabilities, enabling them to effectively leverage this powerful tool in their missions. This course can include **ATAK, TAKX, WinTAK** and/or **iTAK.**

TAK Intermediate: Our intermediate-level TAK course builds upon the fundamentals, equipping users with advanced knowledge and skills to tackle complex missions and operational scenarios. These topics provide a deeper understanding of TAK's capabilities and its role in enhancing mission success.

TAK Server: Our TAK Server course provides comprehensive training on the setup, management, security, and optimization of TAK Server, ensuring that users can effectively deploy and maintain this critical component of the TAK family of systems.

ABOUT US

Founded in April 2000, Chesapeake Technology International (CTI) has established itself as a vanguard in the field of software and systems development, with a dedicated focus on advanced, user-centric technologies. Our journey began with a clear mission: to deliver high-end, user-focused software and systems development products tailored for the Defense and Intelligence communities. Our ethos is rooted in the power of collaborative development, reflecting our belief that the best solutions emerge from a synergy of expertise and practical experience.
