TAK-as-a-Service (TAKaaS)

By choosing TAKaaS from CTI, you'll unlock the full capabilities of the TAK Ecosystem, ensuring operational readiness and mission success across diverse scenarios and multi-domain operations. TAKaaS provides access to a comprehensive suite of TAK integration services customizable to your unique mission-sets and operational needs, including ecosystem design, hardware and software selection, TAK Server set-up, TAK Training, mission-specific plugin loadouts, custom software development, and ongoing operational support.

TAK Ecosystem

The TAK (Tactical Assault Kit/Team Awareness Kit) Ecosystem is a core suite of georeferenced imagery and communications tools that allow for scaled operational planning, data sharing, and collaboration. With TAK, your team can get oriented quickly and rapidly respond to threats.
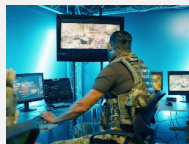

Trusted Infrastructure & Support Team

CTI's TAK deployments include redundant infrastructure and 24/7 monitoring for reliability. Standing behind these deployments are a dedicated team of former special operations and public safety SMEs, providing unmatched operational experience and expertise.

GovCloud TAK Server & Multi-Agency Ops

CTI's secure GovCloud TAK Server provides a common operating picture for all connected TAK users, allowing for real-time sharing of critical information and coordination across agencies and jurisdictions – helping ensure proper federation, collaboration, and mission success.
